

Dr Kishore Sieunarine was born in Trinidad and Tobago and moved to Australia many years ago.

He is a vascular surgeon who gives his time free of charge testing for Abdominal Aortic Aneurysms, or AAA as the condition is commonly referred to. This is done by an ultrasound procedure which is non invasive and takes only a few minutes. If an aneurism is left untreated one in three will rupture, causing death in more than 82% of cases. People at risk are males, smokers, the over 55's, those with high blood pressure and those with a family history of aneurysms.

Dr Kishore Sieunarine has been screening for abdominal aneurysms for more than 25 years. Over those years he has held many clinics for Lions Clubs around West Australia. Just to mention some clubs he has visited are Dongara-Denison, Jurien Bay and Ocean Reef not to mention this club Duncraig. At your club session at Gibson Park Community Centre 182 members of the public were scanned. This, in

itself, is a magnificent achievement and it was voted as a project worth doing for the benefit of the Community.

The Doctor has run scanning for Abdominal Aortic Aneurysms for other groups of people. He ran a clinic for a nursing group in Kalamunda recently.

No doubt that over the years the testing performed by Dr Kishore Sieunarine has saved many lives. We thank him for his valuable expertise and may he be giving his much needed assistance to the community of West Australia for many years to come.
